

# Tin Lantern

## **Supplies needed:**

- empty metal can
- wire or string for handle
- hammer
- nail
- tealight candle

## **Directions:**

- Remove label and clean metal can
- Fill with water and freeze until solid
- Lay can on flat surface and cushion with a towel
- Using a nail and hammer, punch a hole on both sides of top of can just below lip for a handle
- Before ice melts, punch holes through can making any design to allow light to shine through
- Cut a piece of thin wire or string to fashion a handle
- Let the ice melt and dry the can
- Place a tealight inside
